

# Small or tall, all fall in thrall of our Ball Wall's *magnetic* attraction!

**Easily turn an empty wall or corner in your museum into a vibrant center of creative discovery.** The key ingredients are a steel-skinned wall, some golf-sized whiffle balls and a bunch of Exhibit Guys pipes, elbows, tippers and tees with durable kid-friendly magnetic bases. Larger contraptions, like **'plinko'** and **'flipflops'** can be fixed in place to act as focal points for the kids' constructions. Add an **Archimedes Screw** to reach new heights of frantic dynamic magnetic kinetic magic!

To save money, you can mount the galvanized steel panels yourself following our simple instructions; or we can design and install the entire exhibit, like the one shown here which we made for Vilvite in Bergen, Norway. We'll be glad to customize a package to meet your needs.

If you already have a ball wall, be sure to check out our new additions: **starting gates, tippers, dippers and flippers**, and our new 'more affordable' kid-driven **Helix** ball lifter.

**Ask about our Special Pricing for ACM Member Museums!**
